PROFILE

Data Engineer with a strong foundation in data engineering, data analysis, and data processing. Passionate about designing robust data solutions and leveraging data to create business value. Seeking to apply my expertise in Big Data, Data Engineering, and Data Science to contribute to an innovative, data-driven organization.

SKILLS

- **Data Engineering & Big Data :** ETL/ELT, data processing and integration, data warehousing, dimensional modeling, Apache NiFi, Apache Airflow, Apache Kafka, dbt
- **Data Analysis:** Python, SQL, Power BI, geospatial analysis (ArcGIS)
- **Machine Learning :** Scikit-learn, TensorFlow, Keras
- **Databases:** OLAP (ClickHouse), Oracle, PostgreSQL, NoSQL (Cassandra, MongoDB)
- **Programming :** Python, SQL, Flutter (Dart), API integration
- **Tools :** Docker, Git/GitHub, VS Code, Jupyter Notebook
- **Soft Skills :** Analytical thinking, attention to detail, problem-solving, teamwork

PROFESSIONAL EXPERIENCE

- **Master's End-of-Studies Internship – Djezzy**

Analysis and Prediction of Points of Sale Behavior via Big Data and Machine Learning
Designed and developed a Big Data platform covering the entire data lifecycle, from data ingestion to analytical insights. Built automated data pipelines with monitoring, orchestration, and dependency management to ensure reliable and consistent data processing. Developed machine learning use cases, including customer segmentation, dormancy prediction, and regression models for transaction volume forecasting.

- **Bachelor's Final-Year Project – Skin Safe**

Deep Learning-Based Skin Cancer Detection System
Designed and developed a mobile application integrating a convolutional neural network (CNN)-based image classification model for skin cancer detection. Performed image preprocessing, model training, and evaluation in Python, then integrated the model into a Flutter application with user authentication and Firebase-based data storage.

- **Personal Project – Data Warehouse & Business Intelligence**

Designed a data warehouse based on dimensional modeling, implemented ETL processes, and developed interactive dashboards to analyze business performance.

EDUCATION

- **Master’s Degree in Big Data Analytics**
  Houari Boumediene University of Science and Technology (USTHB) — Algiers, Algeria
  Graduation: June 2026
- **Bachelor's Degree in Computer Science**
  University of Constantine 2 — Constantine, Algeria
  Graduation: June 2024
